UNIT 1. WHAT'S HAPPENING?

DESCRIBING ECOLOGICAL PROBLEMS

ABSTRACT:

In this class, we identify and describe some ecological problems around the world and how to give possible solutions to avoid these problems.

- **Key words:** *regular and irregular verbs, should, shouldn't.*

OBJECTIVE:

- At the end of the class, students will be able to describe an ecological problem identifying the general problem and give some suggestions and advice to avoid it.

Are you worried about what happened with the planet??

What is in the North Pole happening?

- In the North Pole, icebergs **are melting** and the sea level **is increasing** each year.

- People shouldn't produce too much heat in the planet.

What are in the oceans happening?

- In the Atlantic and Pacific oceans, companies and ships **are spilling** substances, oils and petroleum. These actions **are provoking** marine animals start disappearing.

PROBLEM

- Government should punish these companies with big fines.

SOLUTION

What is happening with our oxygen?

- Nowadays, most cities around the world **are suffering** with air pollution. Big companies, cars and people **are emitting** CO₂, fume and gases.
- People should contribute with the new Ecological programs in their countries.

What are happening with the forests?

- Cutting down is a big problem, they **are finishing** with forests and jungles around the world. There is not more oxygen to breathe.
- Each person should plant at least 5 trees in his/her life.

PROBLEM

ADVICE

What is happening with the planet?

- Our planet **is dying** each year.
- Most human activities **are producing** heat.
- Heat **is keeping** inside the atmosphere.
- This heat **is causing** the planet gets warmer each time more.

PROBLEMS

So:

- **We need to do something to avoid these problems!!!**

ADVICE

- **YOU SHOULD BE GREEN**
