

## Editorial

The Mexican Journal of Bioethics is a publication of the Autonomous University of the State of Hidalgo to comply with the dissemination of bioethical knowledge.

As in other issues, the issues that are addressed have implications in the field of bioethics, especially in the acts of medical care and research for health. Among them, health accompanied by bioethics, the moral implications and Mexican and Spanish legislation on transplantation and the importance, structure and operation of research ethics committees.

For the Institute of Health Sciences and for the entire Autonomous University of the State of Hidalgo, it will always be a great opportunity to disseminate and respect the ideological plurality in issues concerning bioethics.

This editorial and scientific committee thanks the authors for their interest in participating with their work to enrich the dissemination of bioethics in the academic field.

I recognize the team of this Magazine for their great work in its promotion and in all the activities carried out to present a new publication. "Love, Order, and Progress".

Dra. Rebeca María Elena Guzmán Saldaña  
Director of the Institute of Health Sciences
